

# The ExecutiveInsite Report

Prepared for: Minnesota Conference UCC  
 Study area: 10 mi Around 300 Union Street, Northfield, Minnesota 55057, United States  
 Base State: MN  
 Current Year Estimate: 2019  
 5 Year Projection: 2024  
 Date: 10/27/2020  
 Semi-Annual Projection: Fall

This ExecutiveInsite Report has been prepared for Minnesota Conference UCC. Its purpose is to "tell the demographic story" of the defined geographic study area. ExecutiveInsite integrates narrative analysis with data tables and graphs. Playing on the report name, it includes 12 "Insites" into the study area's story. It includes both demographic and beliefs and practices data.

ExecutiveInsite is intended to give an overview analysis of the defined geographic study area. A defined study area can be a region, a zip code, a county or some custom defined geographic area such as a radius or a user defined polygon. The area of study is displayed in the map below.

## THE STUDY AREA

## THE 12 INSITES

INSITE	PAGE
Insite #1: Population, Household Trends	2
Insite #2: Racial/Ethnic Trends	3
Insite #3: Age Trends	4
Insite #4: School Aged Children Trends	6
Insite #5: Household Income Trends	7
Insite #6: Households and Children Trends	9
Insite #7: Marital Status Trends	10
Insite #8: Adult Educational Attainment	11
Insite #9: Employment and Occupations	12
Insite #10: Mosaic Household Types	13
Insite #11: Generations	14
Insite #12: Religious Program Or Ministry Preferences	15

## More Information

Please refer to the last page of the report for additional notes and interpretation aides in reading the report.

Not all of the demographic variables available in the MI System are found in this report. The FullInsite Report will give a more comprehensive view of an area's demographics.

Also, the Impressions Report adds additional social, behavioral views and the Quad Report provides a detailed view of religious preferences, practices and beliefs.

# INSITE #1: POPULATION AND HOUSEHOLD TRENDS

## Population:

The estimated 2019 population within the study area is 34,174. The 2024 projection would see the area remain stable at 116 to a total population of 34,290. The population within the study area is growing somewhat slower than the statewide growth rate. While the study area is projected to grow by 0.3% in the next five years, the state is projected to grow by 3.4%. The study area's estimated average change rate is 0.1%.

## Households:

The households within the community are growing but not as fast as the population, thus the average population per household in 2010 was 3.00 but by 2024 it is projected to be 2.99. Compare this to the statewide average which for the current year is estimated at 2.54 persons per household.

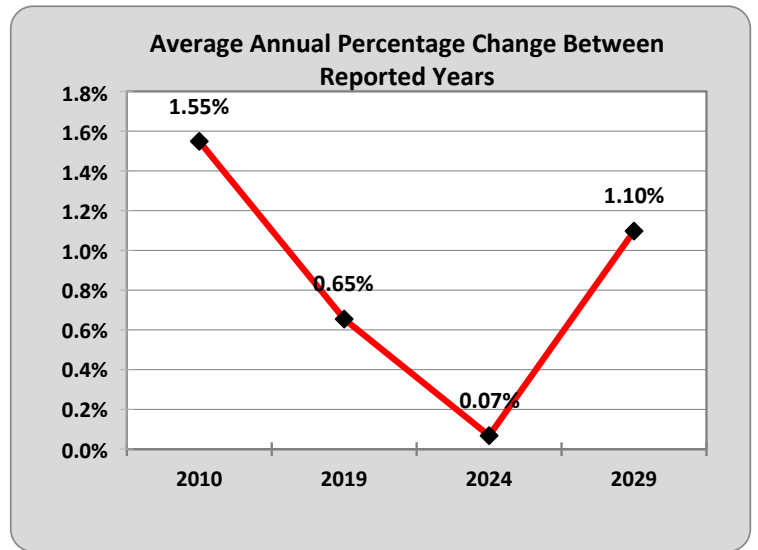

## Population Per Household

Population per Household: The relationship between population and households provides a hint about how the community is changing. When population grows faster than households, it suggests an increase in the persons per household. This can only happen when more persons are added either by birth or other process such as young adults in multiple roommate households or young adults returning to live with parents. In some communities this can occur when multiple families live in the same dwelling unit.

## Family Households:

Family households provide an additional hint about the changing dynamics of a community. If family household growth follows population growth, then it would be reasonable to assume that the increasing population per household comes from additional children. This is the case within the the study area. Family households are growing as fast as the population suggesting that the increasing population per household is from additional children.

Population/Households & Family Trends		2000	2010	2019	2024	2029
<b>Population</b>		<b>27,945</b>	<b>32,273</b>	<b>34,174</b>	<b>34,290</b>	<b>36,171</b>
Population Change			4,328	1,901	116	1,881
Percent Change			15.5%	5.9%	0.3%	5.5%
<b>Households</b>		<b>8,626</b>	<b>10,749</b>	<b>11,447</b>	<b>11,476</b>	<b>12,201</b>
Households Change			2,123	698	29	725
Percent Change			24.6%	6.5%	0.3%	6.3%
<b>Population / Households</b>		<b>3.24</b>	<b>3.00</b>	<b>2.99</b>	<b>2.99</b>	<b>2.96</b>
Population / Households Change			-0.24	-0.02	0.00	-0.02
Percent Change			-7.3%	-0.6%	0.1%	-0.8%
<b>Families</b>		<b>6,311</b>	<b>7,505</b>	<b>8,169</b>	<b>8,209</b>	
Families Change			1,194	664	40	
Percent Change			18.9%	8.8%	0.5%	

NOTE: Family Household data is not projected out 10 years.

## INSITE #2: RACIAL-ETHNIC TRENDS

The US population's racial-ethnic diversity is continually adding new and rich cultural mixes. This data considers the five groups for which trending information is available. Please note that several groups are aggregated into a single category due to their smaller size. Those persons who indicated Hispanic or Latino ethnicity along with a racial category have been separated into a Hispanic or Latino category.

The Population: Racial/Ethnic Trends table provides the actual numbers and percentage of the total population for each of the five racial/ethnic categories. Pay special attention to the final column on the right. This will quickly indicate the direction of change from the last census to the current five year projection.

The Racial Ethnic Trends graph displays history and projected change by each racial/ethnic group.

This chart shows the percentage of each group for the current year estimate.

### The percentage of the population...

Asian (Non-Hisp) is projected to remain about the same over the next five years.

Black/African American (Non-Hisp) is projected to remain about the same over the next five years.

White (Non-Hisp) is projected to remain about the same over the next five years.

Hispanic or Latino is projected to remain about the same over the next five years.

	2010	2019	2024	2010%	2019 %	2024 %	2010 to 2024 %pt Change
<b>Race and Ethnicity</b>							
Asian (NH)	766	768	763	2.37%	2.25%	2.23%	-0.15%
Black/Afr Amer (NH)	291	339	338	0.90%	0.99%	0.99%	0.08%
White (NH)	28,736	30,300	30,328	89.04%	88.66%	88.44%	-0.60%
Hispanic/Latino	1,936	2,181	2,255	6.00%	6.38%	6.58%	0.58%
P Is/Am In/Oth (NH)	544	586	607	1.69%	1.71%	1.77%	0.08%
<b>Totals:</b>	<b>32,273</b>	<b>34,174</b>	<b>34,291</b>				

# INSITE #3: AGE TRENDS

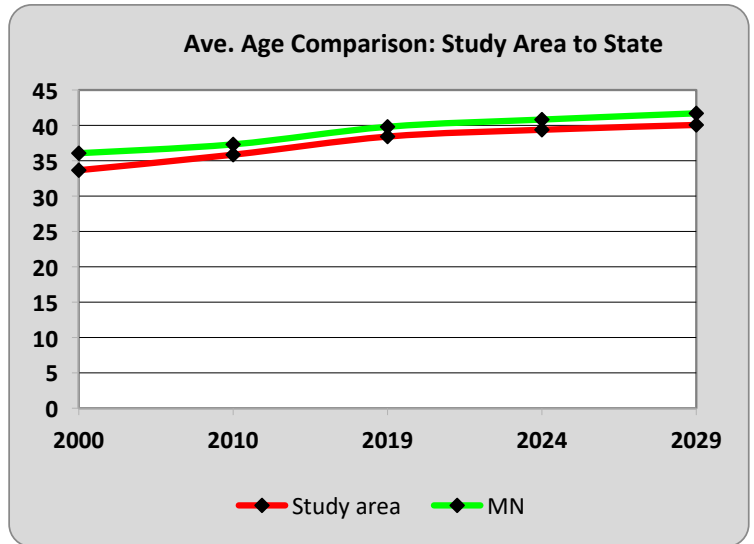

A community's age structure and how it is changing is an important part of its story. Overall, the American Population has been aging as the Baby Boomers progress through each phase of life. This has been abetted by episodes of declining live births. However, this picture may particularize differently from community to community. There are communities in the US where the average age is lower than some others. In other cases, there is a clear shift toward senior years as the Boomers enter their retirement years.

The Age Trend Insite explores two variables: Average age and Phase of Life.

**Average Age Trends** provides five important snapshots of a community from five data points; the 2000 census, the last census, the current year estimate, the five-year projection and the ten year forecast. These five numbers will indicate the aging direction of a community.

**The Phase of Life Trends** breaks the population into seven life phases that the population passes through in its life time.

AGE					
Average Age Trends	2000	2010	2019	2024	2029
Average Age: Study Area	33.66	35.85	38.42	39.38	40.06
Percent Change		6.5%	7.2%	2.5%	1.7%
Average Age: MN	36.06	37.31	39.80	40.82	41.70
Percent Change		3.5%	6.7%	2.6%	2.2%
Comparative Index	93	96	97	96	96
Median Age: Study Area	28	32	33	33	35

### Summary of Average Age Findings:

The Average Age Trend chart shows both history and projection of the change in average age in the study area. The average age of the study area has been rising for several years. It is projected to rise over the next five years.

A comparison to the average age of the state helps to contextualize the significance of the average age of the study area and its history and projection. In the graph above, the study area and state are laid out side by side. The state's average age is estimated to be about the same as the study area.

## INSITE #3: AGE TRENDS (continued)

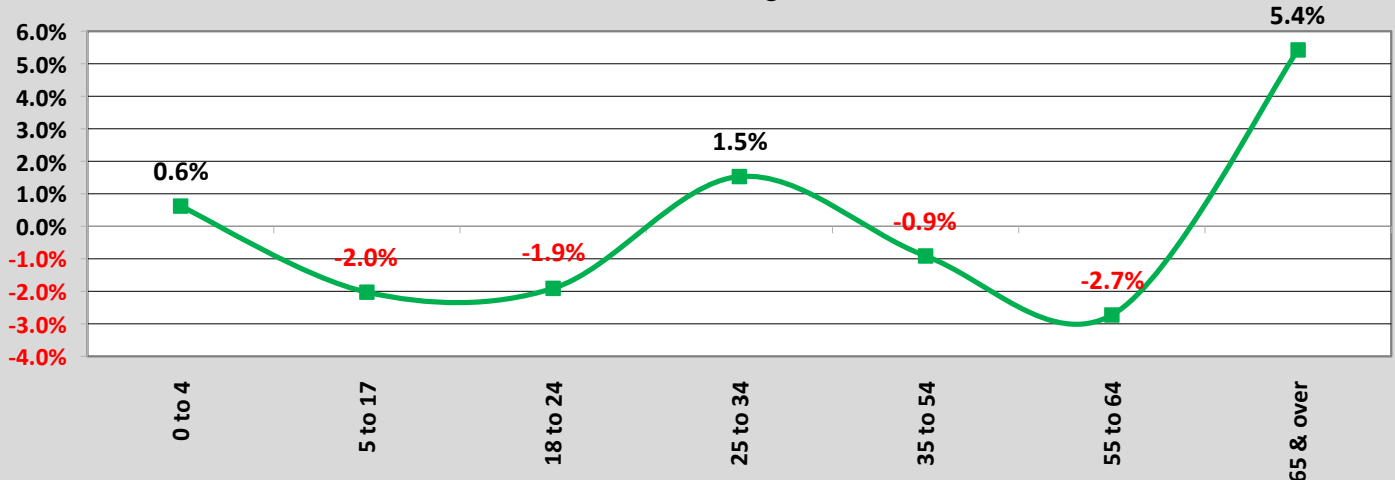

### PHASE OF LIFE

The Phase of Life analysis provides insight into the age distribution of a population across the different stages of life experience. It can reveal a community in transition.

Pay special attention to the color codes of the Change column (far right below). It will immediately indicate which phases are increasing or decreasing as a percentage of the population.

Phase of Life	2010	2019	2024	2029	2010%	2019%	2024%	2029%	Estimated 10 Year %pt Change 2019 - 2029
<b>Before Formal Schooling</b> Ages 0 to 4	1,746	1,509	1,547	1,822	5.4%	4.4%	4.5%	5.0%	0.6%
<b>Required Formal Schooling</b> Ages 5 to 17	5,304	4,585	4,069	4,120	16.4%	13.4%	11.9%	11.4%	-2.0%
<b>College/Career Starts</b> Ages 18 to 24	6,608	7,671	7,599	7,429	20.5%	22.4%	22.2%	20.5%	-1.9%
<b>Singles &amp; Young Families</b> Ages 25 to 34	2,952	3,667	4,157	4,435	9.1%	10.7%	12.1%	12.3%	1.5%
<b>Families &amp; Empty Nesters</b> Ages 35 to 54	8,270	6,845	6,335	6,915	25.6%	20.0%	18.5%	19.1%	-0.9%
<b>Enrichment Years Sing/Couples</b> Ages 55 to 64	3,553	4,621	4,328	3,904	11.0%	13.5%	12.6%	10.8%	-2.7%
<b>Retirement Opportunities</b> Age 65 and over	3,841	5,276	6,255	7,547	11.9%	15.4%	18.2%	20.9%	5.4%

Phase of Life Changes

#### Summary of Phase of Life Findings:

Phase of Life changes reflect the age profile of a community. On average, it takes 2.1 children per woman to replace both mother and father. If the percentage of the population under 20 is declining as a percentage of the total it is likely that the community will see an increase in the more senior aged population possibly due to a decline in birth rates.

In this study area children 17 years of age and younger are declining as a percentage of the total population. Considering the other end of the phases of life, adults 55 years of age and older are increasing as a percentage of the total population.

In summary it may be that the community is aging as children are raised and leave but parents remain.

# INSITE #4: SCHOOL AGED CHILDREN TRENDS

Children are the future! Understanding their specific population dynamics is critical for all planners of social and/or educational services. The “School Aged Children” variable is a subset of the “Required Formal Schooling” segment in the Phase of Life profile. It allows one to zoom in more closely on the children who are of formal schooling age.

The school aged population includes all school aged children including those enrolled in public and private schools, those home schooled and children in institutions.

The School Aged Children variable provides a snapshot of three levels of the population that comprise school age children. The three levels roughly correspond to the following.

- Elementary grades
- Intermediate/Middle School grades
- High School grades

School Aged Children	2010	2019	2024	2010%	2019%	2024%	Estimated 5 Year %pt Change 2019 - 2024
<b>Early Elementary</b>							
Ages 5 to 9	1,992	1,648	1,455	37.6%	35.9%	35.8%	-0.2%
<b>Late Elementary-Middle School</b>							
Ages 10 to 14	1,981	1,700	1,564	37.3%	37.1%	38.4%	1.4%
<b>High School</b>							
Ages 15 to 17	1,331	1,237	1,050	25.1%	27.0%	25.8%	-1.2%

### Summary of School Aged Children Findings:

Early Elementary children ages 5 to 9 are projected to decline as a percentage of children between 5 and 17 by -0.2%.

Late Elementary to Middle School aged children ages 10 to 14 are increasing as a percentage of children between 5 and 17 by 1.4%.

High School aged children 15 to 17 are declining as a percentage of children between 5 and 17 by -1.2%.

Overall, children are aging through, but not being replaced at the younger levels.

# INSITE #5: HOUSEHOLD AND FAMILY INCOME TRENDS

## AVERAGE HOUSEHOLD INCOME AND PER CAPITA INCOME

Average Household Income and Per Capita Income indicate the level of financial resources within a community. Average Household income reflects the average income for each household, whether family or non-family.

Per Capita Income is a measure of the average income of all persons within a household. For family households, this would include all children. It does not mean that each person actually contributes to the average income from work. It is calculated by dividing the aggregate household income by the population.

In this study area, the estimated current year average household income is \$92,512. The average household income is projected to grow by 12.0% to \$103,659.

The estimated per capita income for the current year is \$30,988. The Per Capita Income is projected to grow by 12.0% to \$34,692.

Income Trends	2010	2019	2024	2010%	2019%	2024%	Estimated 5 Year %pt Change 2019 - 2024
<b>Households</b>							
Less than \$10,000	443	501	432	4.1%	4.4%	3.8%	-0.6%
\$10,000 to \$14,999	353	286	248	3.3%	2.5%	2.2%	-0.3%
\$15,000 to \$24,999	866	861	637	8.1%	7.5%	5.6%	-2.0%
\$25,000 to \$34,999	676	807	798	6.3%	7.0%	7.0%	-0.1%
\$35,000 to \$49,999	1,266	1,241	1,159	11.8%	10.8%	10.1%	-0.7%
\$50,000 to \$74,999	2,377	2,103	1,885	22.1%	18.4%	16.4%	-1.9%
\$75,000 to \$99,999	1,754	1,885	1,839	16.3%	16.5%	16.0%	-0.4%
\$100,000 to \$149,999	1,987	2,104	2,335	18.5%	18.4%	20.3%	2.0%
\$150,000 to \$199,999	556	1,021	1,083	5.2%	8.9%	9.4%	0.5%
\$200,000 or more	470	638	1,060	4.4%	5.6%	9.2%	3.7%
<b>Totals</b>	<b>10,748</b>	<b>11,447</b>	<b>11,476</b>				

# INSITE #5: HOUSEHOLD AND FAMILY INCOME TRENDS (continued)

## FAMILY INCOME

Family income is a sub-set of household income. It excludes non-family households. Family households include two or more persons who are related and living in the same dwelling unit. Children are more likely to live in family households. Non-family households are households in which two or more persons live in the same dwelling unit but are unrelated.

The number of families with annual incomes above \$100,000 is projected to decline over the next five years. For the current year, it is estimated that 40.8% of all family incomes exceed \$100,000 per year. In five years that number is projected to be 40.5%.

Income Trends	2019	2024	2019%	2024%	Estimated 5 Year %pt Change 2019 - 2024
<b>Families</b>					
Less than \$10,000	193	186	2.4%	2.3%	-0.10%
\$10,000 to \$14,999	113	105	1.4%	1.3%	-0.10%
\$15,000 to \$24,999	370	360	4.5%	4.4%	-0.14%
\$25,000 to \$34,999	438	512	5.4%	6.2%	0.88%
\$35,000 to \$49,999	794	787	9.7%	9.6%	-0.13%
\$50,000 to \$74,999	1,443	1,442	17.7%	17.6%	-0.09%
\$75,000 to \$99,999	1,489	1,489	18.2%	18.1%	-0.08%
\$100,000 to \$149,999	1,843	1,844	22.6%	22.5%	-0.09%
\$150,000-\$199,999	916	919	11.2%	11.2%	-0.02%
\$200,000 or more	571	564	7.0%	6.9%	-0.12%
<b>Totals</b>	<b>8,170</b>	<b>8,208</b>			

## MEDIAN INCOME BY RACE AND ETHNICITY

Median income by race and ethnicity is a subset of household income. Median income is that point where there are as many households with incomes greater than the median as there are households with incomes less than the median.

Median Income by Race and Ethnicity	2019
Asian Household Income	\$43,332
Black/ African American Household Income	\$24,374
Hispanic/Latino Household Income	\$38,308
White/Anglo Household Income	\$77,180
P Is, Am Indian Other Household Income	\$34,443
Average	\$43,527

# INSITE #6: HOUSEHOLDS AND CHILDREN TRENDS

Diversity of child rearing environments is increasing along with the many other types of growing diversity in the US. To understand this, we begin with the types of households that exist in a community. There are...

- family households with children under 18
- family households without children under 18

The concern of this analysis is family households with children under 18. Of the types of family households with children there are...

- Married couple families
- Single parent families (father or mother)

These two are reported for the study area in the table below.

Households	2010	2019	2024	2010%	2019%	2024%	Estimated 5 Year %pt Change 2019 - 2024
<b>Households with Children under 18</b>							
Married Couple	2,753	2,625	2,448	76.6%	76.7%	75.6%	-1.1%
Single Parent	842	796	788	23.4%	23.3%	24.4%	1.1%

Of the households with children under 18, married couple households are decreasing as a percentage while single parent households are increasing. The graph to the right illustrates this. Bars above the 0% point indicate a family type that is increasing while bars below 0% is decreasing. This provides "insite" into how family households and structures with children are changing in the study area.

A comparison to the state reveals to what extent this community is similar or dissimilar to the state as a whole. The study area's married couple households with children are dissimilar to the state's profile. The percentage of single parent households with children is less than the state.

# INSITE #7: MARITAL STATUS TRENDS

## MARITAL STATUS BY TYPE

Population by Marital Status considers the number and percentage of persons 15 years of age and greater by their current marital status. Trend information as well as a comparison to the study area's state marital status types provide two different views of this social reality.

Marital types reported include..

- Never Married (Singles)
- Currently Married
- Divorced
- Separated
- Widowed

	2010	2019	2024	2010%	2019%	2024%	2010 to 2024 %pt Change
<b>Population by Marital Status: Age 15+</b>							
Never Married	10,024	10,558	10,456	37.2%	35.6%	34.8%	-2.3%
Married	13,991	15,349	15,770	51.9%	51.7%	52.5%	0.6%
Divorced	1,509	2,281	2,350	5.6%	7.7%	7.8%	2.2%
Separated	241	220	205	0.9%	0.7%	0.7%	-0.2%
Widowed	1,211	1,275	1,250	4.5%	4.3%	4.2%	-0.3%

In this community, the current year estimate of marital status reveals a community of adults less likely to be married than the state average for adults. The percentage single, never married in the study area is higher than the state average for adults 15 years and older. Divorce is less prevalent than the state wide average.

Women 15 years and older are more likely to be divorced than men.

Women 15 years and older are more likely to be widowed than men.

## INSITE #8: ADULT EDUCATIONAL ATTAINMENT

The level of educational attainment of a community's adult population is an important indicator of its opportunities and challenges. This analysis will look at the Adult Educational Attainment from three perspectives.

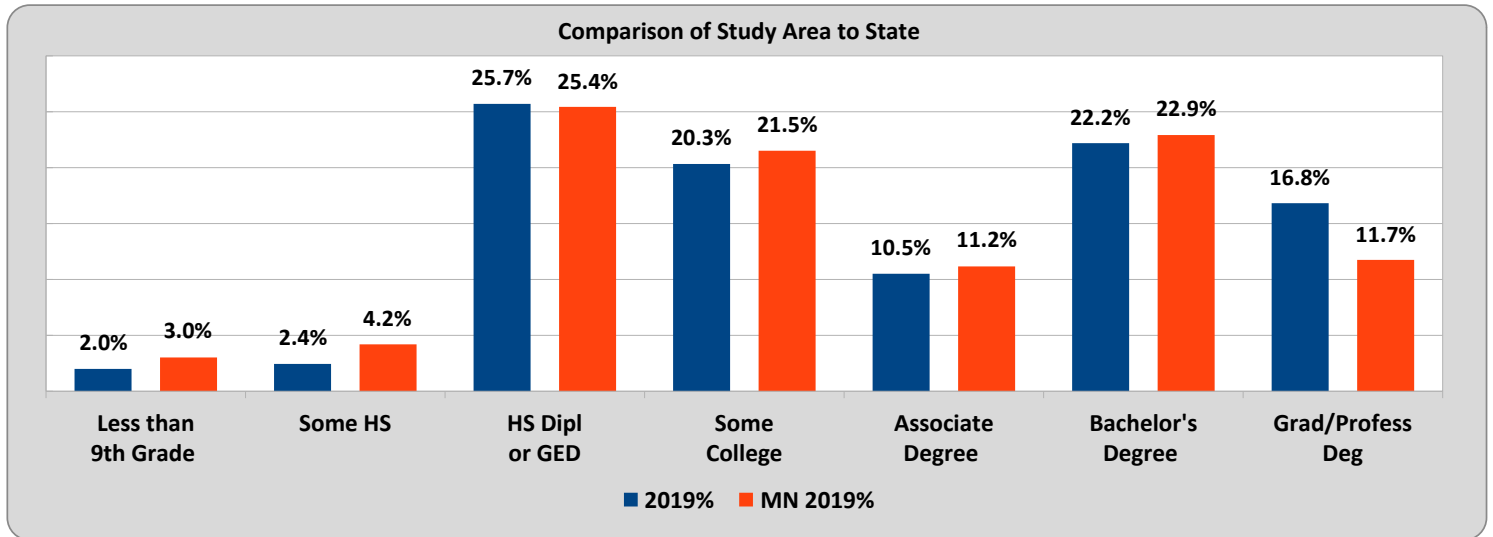

First, it looks to see if the level of educational attainment for adults is rising or not. Second, it compares the level of attainment to that of the state of MN. (If this is a state report, the comparison will be to itself.) Finally, the table provides the percentages from 2010.

### EDUCATIONAL LEVEL ATTAINMENT CHANGE

The educational attainment level of adults has been rising over the past few years. It is projected to rise over the next five years by 0.5%.

### EDUCATIONAL LEVEL COMPARED TO THE STATE

	2010	2019	2024	MN 2019%	2019 Study Area-State Comp Index
<b>Population by Educational Attainment: 25+</b>					
Less than 9th Grade	1.4%	2.0%	1.9%	3.0%	66
Some HS	3.5%	2.4%	2.4%	4.2%	58
HS Dipl or GED	26.2%	25.7%	25.2%	25.4%	101
Some College	20.6%	20.3%	20.5%	21.5%	94
Associate Degree	8.4%	10.5%	10.4%	11.2%	94
Bachelor's Degree	23.1%	22.2%	22.6%	22.9%	97
Grad/Profess Deg	16.9%	16.8%	17.0%	11.7%	143

The overall educational attainment of the adults in this community is greater than the state.

## INSITE #9: POPULATION BY EMPLOYMENT

Like educational attainment, an analysis of a community by its employment types and categories provides an important “insite” into its socio-economics. This analysis looks at two factors.

First is a report of the employed population 16 and over by the traditional “blue collar” and “white collar” occupations and compares these to the state. Second, it looks at the community by the seven standard census bureau occupations and compares them to the state.

### EMPLOYED POPULATION: BLUE COLLAR OR WHITE COLLAR

On the chart to the left, the study area is compared to the state of MN. This study area is close to the state average for White Collar workers. It is close to the state average for Blue Collar workers.

### EMPLOYED CIVILIAN POPULATION BY OCCUPATION

	2019	MN 2019	Comp. Index	Interpretation
<b>Employed Civilian Pop 16+ by Occupation</b>				
Bldg Maintenance & Cleaning	3.2%	3.2%	100	At about the state average.
Construction	7.5%	7.3%	104	At about the state average.
Farming, Fishing, & Forestry	0.8%	0.7%	109	Well above the state average.
Food Preparation Serving	5.5%	5.2%	106	At about the state average.
Healthcare Support	1.8%	2.4%	73	Well below the state average.
Managerial Executive	14.6%	16.8%	87	Well below the state average.
Office Admin	13.6%	12.6%	108	At about the state average.
Personal Care	5.3%	4.1%	129	Well above the state average.
Production Transportation	11.9%	12.8%	92	At about the state average.
Prof Specialty	26.3%	23.4%	112	Well above the state average.
Protective	1.1%	1.3%	84	Well below the state average.
Sales	8.4%	10.0%	84	Well below the state average.

## INSITE #10: MOSAIC Segments

Mosaic is a geo-demographic segmentation system developed by and for marketers. Instead of looking at individual demographic variables, a segmentation system clusters households into groups with multiple common characteristics. Demographic variables that generally cluster together would include income, educational levels, presence of children and occupations among others.

This database is developed by Experian. Some find the information helpful because it presents a multi-dimensional view of a community.

In the report below, the top 15 Mosaic Segments of the study area are provided. (If less than 15, rows will be blank.)

**NOTE: For a full description please see the DI Demographic Segment Guide (Mosaic) under the Help menu on the Documents gallery.**

	2019	2019%	State %	Comp Index	Relative to the MN State Ave.
<b>Mosaic Segments</b>					
C11 Booming with Confidence - Aging of Aquarius	1,193	10.4%	4.5%	232	Well above the state average
E21 Thriving Boomers - Unspoiled Splendor	1,070	9.3%	4.5%	207	Well above the state average
I30 Family Union - Stockcars and State Parks	851	7.4%	3.9%	191	Well above the state average
J34 Autumn Years - Aging in Place	725	6.3%	4.8%	131	Well above the state average
O53 Singles and Starters - Colleges and Cafes	710	6.2%	1.4%	431	Well above the state average
E20 Thriving Boomers - No Place Like Home	564	4.9%	3.7%	132	Well above the state average
B09 Flourishing Families - Family Fun-tastic	554	4.8%	2.0%	247	Well above the state average
D15 Suburban Style - Sports Utility Families	528	4.6%	1.9%	243	Well above the state average

# INSITE #11: GENERATIONS

A powerful way to envision demographics is by following a generation through its phases of life. This is because there are, in a general sense, common life experiences at each phase of life. But even more interesting is to understand a generational cohort group that has a unique sense of belonging to others born and coming of age together. More than mere age bracketing, a generation develops a sense of identity as a group based upon their coming of age experiences—how they were parented and major world defining events, such as 9/11. Using the Strauss and Howe model of generations one is able to see a more three-dimensional view of a generational group, bringing mere age demographics to life.

According to the Strauss and Howe model, members of a generation share three qualities. \*

- An age location in history
- Some common beliefs and behaviors, including basic attitudes about risk taking, culture and values, civic engagement, and family life
- A common perceived membership in a generation, e.g., Boomers, Gen X, Millennials etc.

Contemporary worship experiences	39.7%	12.2%	39.4%	11.2%	101	108
Spiritual discussion groups	39.8%	10.2%	39.2%	11.1%	101	92
Traditional worship experiences	41.3%	21.4%	39.2%	20.3%	105	106
Warm and friendly encounters	47.0%	34.8%	45.6%	33.6%	103	104
The quality of sermons	40.0%	30.4%	37.3%	28.2%	107	108

# Supporting Information

## Interpreting the Report

The ExecutiveInsite report is designed for easy reading. But there are several tools provided in the tables that make this easier.

**Change over time:** Several trend tables have a column indicating a change over time. Generally these tables begin with the last census, include the current year estimate, a five year projection and if available, a 10 year forecast. The data in each cell represents a percentage change up or down.

**Color Coding:** Both the "Change over Time" and "Comparative Indexes" columns are color coded to easily spot any change and the direction of that change.

Change:	Increasing	Stable	Declining
Index:	Above Ave	Ave	Below Ave.

## Variable Definitions

Full variable definitions can be found in the MI Demographic Reference Guide. Download it free from the Help/Documents menu located on the map screen of your

**Indexes:** Some variables will have a column called "Comparative Index." An index is an easy way to compare a study area with a larger area. For this report, all comparisons are with the state or states within which the study area falls. The indexes can be interpreted as follows.

- Indexes of 100 mean the study area variable is the same as its base area.
- Indexes greater than 100 mean the study area variable is above the base area. The higher the number, the greater it is above the base.
- Indexes less than 100 mean the study area variable is below the base area. The lower the number, the greater it is below the base.

## Support
